What's a Texting Nickname?
The nickname identifies the account in a text message. For example, to check your transaction history, text STMT followed by the account nickname, such as S1.

How many accounts should I select?
You can manage multiple accounts in Mobile Banking. However, consider the number of accounts you enable to avoid receiving too many text messages. Know the message limit on your wireless service plan to avoid overage charges.

After choosing accounts, click on Continue

Sending text messages through Mobile

You can send text messages through your mobile phone to get your balance, history, ATM info, Branch address, or to Stop using mobile banking.

Example: if you want to send a text to get your balance for all of your accounts you would send a text to 31727 with the following information in the body of the text:

BAL 0922

That will send you the balances to all of your accounts. With the balance text you cannot specify just one account to get the balance, it will always return the balances for all accounts you have activated.

If you wanted to send a text message to get the history of your checking account you can specify which account by the nicknames you chose when you selected which accounts you wanted activated in Mobile Money.

HIST 0922 Mine

This will return all history for the account you named 'Mine'. You can text back the word 'next' in order to get more history items for that account. You can get the amount of history through Mobile that you can view through Internet Banking.
